

We at

support Edible Edinburgh's vision for our city:

FOOD

Food is healthy and fairly traded.
Fresh produce is locally grown.

PEOPLE

People can afford to eat well and
food poverty is a thing of the past.

ECONOMY

There is a thriving food economy
with many more diverse and successful
food businesses and great training
to support them.

CULTURE

Culture is transformed and
good food is at the centre of
Edinburgh life.

ENVIRONMENT

The environment benefits from
better ways of growing, shopping
and eating food that are better for
wildlife and better for our planet.

We have signed this
Edible Edinburgh Charter
to show our commitment to:

- Serve only good food to our students, employees, patients or customers
- Procure healthy and sustainable food that supports local economic prosperity
- Use ingredients grown and sourced using methods that protect our wildlife and our planet
- Support our staff, customers and community to grow food
- Support commercial opportunities for local food businesses and enterprises
